# Assignment 2 (ReadMe File)
Fan Li – 16212155

The way to display countries' name is to using ***mouseover*** and ***mouseout*** event, confined with techniques related to "***tooltips***".
Inspiration comes from this example: http://bl.ocks.org/d3noob/a22c42db65eb00d4e369.
Display like below:

For the journey of a selected country, you can ***click*** any circle in the visualisation to let it happen. (shows like the below picture)

- Click reset button ***once***, to remove the journey of the selected country, also, all circles return back to the initial positions.
- ***Double*** click reset button, to cancel the selection of the country.

Extra feature: Let user to filter the visualisation by selecting different continents. (display like the below picture)
